

SMP

The diagram consists of three light blue rectangular boxes with thick black borders. On the left is a smaller box labeled 'SMP'. To its right is a larger box divided into two equal vertical sections. The left section of this larger box is labeled 'RUNq' and the right section is labeled 'MSGq'. A dotted line with small gray dots at each intersection connects the right side of the 'SMP' box to the left side of the larger box, specifically connecting the top and bottom edges.

RUNq

MSGq
